

SENEGAL

This guide is compiled from the FIDI Customs Guide for reference only. Customs regulations change frequently; please consult your Seapoe relocation consultant for the latest requirements before shipping.

Updated 2024

Remark

Customs Prescriptions

- Many outbound containers are scanned randomly. If customs identifies a suspicious package, they can request that the container be unloaded.
- There is an additional charge for the transport to the scanner and the scan itself.

Remarks

- Port manager now oversees certain port formalities. Previously these formalities were the remit of our forwarding agents. As a result:
- Export transit time has increased to from 3 to 8 working days.
- This has resulted in extra costs for container immobilisation.
- The local mover must allow extra time for customs formalities or risk missing the date of departure.
- For additional information on the export formalities for HHG/PE, contact your local agent.
